Unit no. NT-89

IKM Testing AS

NITROGEN TANK 6 BAR

Dimensions

Length(mm).....	2991	Width(mm).....	2438	Height(mm).....	2591
Weight - Tara (kg).....	5100	Weight - Payload (kg).....	5933	Weight - Gross (kg).....	11033

Lifting/ Transportation.....: Frame with forklift channels and lifting slings are certified in acc. to DNV 2.7.1.
Certificate(s) / Serial No:.....: 2219 (Serial no. frame: NT-89)

Construction year

Built.....: 2011

Area of use / certification

Onshore/offshore.....: Offshore

Flow / Pressure / Volume

Tank Volume (ltr).....: 7730
P-max (bar).....: 6
P-max Transport (bar).....: 2

Connections

Inlet connection.....: ACME NI 150
Outlet connection.....: ACME NI 150

Filter

Inlet Filter house.....: Approx. 0,6% of total volume/day

Additional information

Equipment / Functions.....: TANK SHALL NOT BE FILLED MORE THAN 95% (7344 ltr)

Double set of safety valves, transport valve, drip pan under valve armatures, manometer and level gauge.

To avoid condensation/icing, the tank must always be pressurised.

Inlet Connection LN2 behind.
