

NITROGEN TANK 6 BAR

Dimensions

Length(mm).....: 2991 Width(mm).....: 2438 Height(mm).....: 2591
Weight - Tara (kg).....: 5300 Weight - Payload (kg).....: 10344 Weight - Gross (kg).....: 15644
Lifting/ Transportation.....: Frame with forklift channels and lifting slings are certified in acc. to DNV 2.7.1.
Certificate(s) / Serial No:.....: ST-8386 (Serial no. frame: NT-157)

Construction year

Built.....: 2012

Area of use / certification

Onshore/offshore.....: Offshore

Flow / Pressure / Volume

Tank Volume (ltr).....: 7890
P-max (bar).....: 6
P-max Transport (bar).....: 2
Vaporization.....: Approx. 0,5% of total volume/day

Connections

Inlet connection.....: ACME NI 150
Outlet connection.....: ACME NI 150

Filter

Inlet Filter house.....: Washable strainer

Additional information

Equipment / Functions.....: TANK SHALL NOT BE FILLED MORE THAN 95% (7496 ltr)

Double set of safety valves, transport valve, drip pan under valve armatures, manometer and level gauge.

To avoid condensation/icing, the tank must always be pressurised.

Inlet Connection LN2 behind.
