

NITROGEN TANK 20 BAR

Dimensions

Length(mm).....: 2990 Width(mm).....: 2437 Height(mm).....: 2591
Weight - Tara (kg).....: 6000 Weight - Payload (kg).....: 7820 Weight - Gross (kg).....: 13820
Lifting/ Transportation.....: Frame with forklift channels and lifting slings are certified in acc. to DNV 2.7.1.
Certificate(s) / Serial No:.....: AB4297 (Serial No. frame NT-173)

Construction year

Built.....: 2020

Area of use / certification

Onshore/offshore.....: Offshore

Flow / Pressure / Volume

Tank Volume (ltr).....: 7376
P-max (bar).....: 20
P-max Transport (bar).....: 2
Vaporization.....: Approx. 0,5% of total volume/day

Connections

Inlet connection.....: ACME NI 150
Outlet connection.....: ACME NI 150

Filter

Inlet Filter house.....: Washable strainer

Additional information

Equipment / Functions.....: TANK SHALL NOT BE FILLED MORE THAN 95% (7007 ltr)

Double set of safety valves, transport valve, drip pan under valve armatures, manometer and level gauge, lugs for tiedown.
